

Sequence logo for the 10bp motif GTCAGTTCGAT. The logo displays the probability of each nucleotide (A, C, G, T) at each position. The top row shows the most likely nucleotide for each position: G, T, T, T, C, A, G, T, T, T, C, A. The bottom row shows the other three nucleotides for each position. The colors are: G (yellow), C (blue), A (green), and T (red).
